SUMMARY

Highly motivated and dedicated computer engineering graduate with a strong aptitude for learning new technical concepts and tools. Seeking a position in the IT industry to further enhance my technical skills and professional growth. Passionate about web development and Android development, with a specialization in full stack Java development from CIIT Institute. Committed to delivering high-quality results, I am eager to contribute my knowledge and enthusiasm to drive innovation and success in the field.

PROJECTS

Audio Signal Processing

IOT 11/2021 - 04/2022 Pune

- The project involves developing audio signal processing algorithms and techniques to enhance the quality and functionality of audio signals. This includes working on various aspects such as noise reduction, equalization, compression, and spatial audio processing.
